WELCOME MESSAGE

It is with much pleasure that I invite you to the 11th Annual Scientific Meeting of the Malaysian Society of Hypertension (MSH). As usual, MSH opens a new year with the first of the scientific meetings. This year is no different.

The programme for 2014 will prove to be the most exciting, impactful, empowering and energising. A league of prominent speakers, our own and from neighbouring countries, as well as from Europe, Canada and Australia, will speak and debate on topics which matter most in hypertension today. These will range from the bench, to the bedside, to the community, and to the world at large. Controlling hypertension, not just in this country but worldwide, continues to be the highly elusive holy grail. What should be done, what can be done and how can this be done to address this challenge? The Speakers will highlight and debate the drugs, the practices, the guidelines, the technology, the reasons and the challenges behind this massive effort. I hope you will be there to see this happening before your own eyes, and be part of this exciting and important movement.

The 2014 ASM will also devote its resources and focus on our young doctors, the housemen and the junior medical officers. Much has been said about the impact which the vast number of junior doctors is making to the health scene in this country. MSH wishes to be part of the solution, to help better equip our future doctors. Thus two workshops have been designated as well as a post-meeting workshop on Sunday afternoon. I hope our young colleagues will not miss this opportunity. This is our CSR, and our commitment to the future of medicine in this country.

So, welcome to the 11th Annual Scientific Meeting of the MSH. Keep the dates – 17th to 19th January 2014. It's happening in Shangri-la Hotel, Kuala Lumpur.

Dr Khalid Yusoff

Professor Dato’ Dr Khalid Yusoff
